

The Hastings and Bexhill Wood Recycling Project

SPONSORSHIP OPPORTUNITY WITHIN ST LEONARD'S GARDENS

Re-introducing wildlife to this newly restored public garden in the heart of St Leonards-on-Sea

Recently renovated with the aid of a Heritage Lottery Fund grant, St Leonard's Gardens offer a tranquil oasis in the Maze Hill area of St Leonards, with views to the sea. The scheme has been designed to provide colour all year round with a mixture of herbaceous plants, shrubs, bulbs and trees clustered together.

A central feature is the ornamental pond with water lilies. The park is also potentially a rich habitat for wildlife.

There is an opportunity for local business and individuals to get involved with encouraging wildlife back into the area.

The Hastings & Bexhill Wood Recycling Project is a social enterprise dedicated to keeping wood out of landfill and providing training for local unemployed people. We are collaborating with the Friends of St Leonards Gardens to make and install the ideal homes for many species of birds, bats, small mammals and many types of friendly insects like bees, butterflies and moths.

nest, feed
& breed

The Concept:

LOCAL BUSINESS SPONSORSHIP
for **LOCAL PARK WILDLIFE PROJECT**
with **LOCAL WOOD RECYCLING PROJECT** providing **TRAINING AND WORK**
for **LOCAL UNEMPLOYED PEOPLE**

Support this pioneering project and your business will be helped by the very positive PR that it will generate. The aim is to provide a blueprint for similar projects all round the country and receive press coverage both locally and nationally.

Each sponsor will pay for a numbered box that will appear on a map of the park and they will be credited on the site map. A website will be set up to monitor the project and we plan to have a study centre in the South Lodge providing information about the project for use by local schools and environmental groups.

Birds have different nesting and territorial requirements and by introducing a range of different styles and sizes of birdbox it will be possible to attract and encourage certain less common species to nest in St Leonard's Gardens. Local ornithologists have pinpointed those we are most likely to attract and a range of birdboxes has been specially designed by H&BWRP's Stewart Walton.

Hastings & Bexhill Wood Recycling Project: Unit 42 Britannia Enterprise Centre, Waterworks Road, Hastings TN34 1RT

Sponsorship Form
